
ÚRNICO

HISTORY OF ORIGIN OF THE URN

Since the earliest times, a wide variety of jewellery and utility items have been made from clay. Due to their character and purpose, they had different shapes and sizes, combined with a certain type of decoration. The process of producing ceramics is a very comprehensive subject, so we would like to share with you a fragment about the creation of our unique objects, which are grouped under the brand URNICO.

The urns we present are created from start to finish in our studio. The entire process begins with the sketch and the design phase. After putting the ideas on paper, we start making models and prototypes, to which we try to adapt a certain type and character of decoration and coloring. All urns are handmade, giving them a unique and exceptional character.

We invite you to familiarize yourself with the full offer.
